

## **Feral by Natali Mandila**

"Feral" intends to create a body that behaves with qualities of nature, such as the automated principles that contribute to a continuous transformation. Leading to the realisation of the strong affinity which connects us to the world of plants and animals, and the need to reconnect with earlier forms of our existence. The aim is to entice feelings that challenge the senses and associations to the human form and thus be seen as an independent entity, as a mass of constantly changing forms, as an animal driven by the urge to exist. "Feral" was created under the support of Garage Performing Arts Center's Residency Programme.
